

Subject	Increasing oil volume on cut & start
Description	drill out restrictor
Modified	24-11-04
Location	Main block
Model	1510-1514 T

The hydraulic fitting in the circle is a 3/8" X 1/2" MM 1mm restricted fitting, this should be drilled out to 1.5mm on Twin machines.

This will increase the oil flow to the Cut & Start cylinders.
